Machine and Spare Parts

Industrial replacement components sourced to drawings, samples, material grades and operating conditions.

Subcategories: Bearings • Gears • Couplings • Machined components

Precision Ball Bearings MP-001

Standard and application-specific bearings for machinery maintenance and production. Selection requires dimensions, load, speed and sealing details.

Material: Bearing-grade steel

Options: Type, dimensions, seal, clearance and packaging

Steel Gears and Shaft Couplings MP-002

Machined transmission components supplied to drawing or sample. Material, heat treatment and tolerance requirements need confirmation before quotation.

Material: Carbon, alloy or stainless steel

Options: Drawing, module, bore, heat treatment and finish

Catalogue note: Representative sample imagery and specifications. Final material, dimensions, compliance, MOQ, pricing, packaging and lead time are confirmed against the approved supplier quotation and sample.

Auto Parts

Automotive replacement parts sourced by specification, drawing, sample or confirmed vehicle application.

Subcategories: Brake parts • Filters • Suspension parts • Electrical components

Brake Pad Set AP-001

Replacement friction pads sourced to approved specification and verified application data. Testing and destination-market compliance must be agreed before order.

Material: Steel backing plate and friction compound

Options: Application, compound, shim, sensor and packaging

Air and Oil Filter Set AP-002

Engine filtration products available across common formats. Exact selection requires dimensions, technical specification or verified cross-reference data.

Material: Filter media with metal or polymer housing

Options: Dimensions, media, gasket, packaging and labeling

Catalogue note: Representative sample imagery and specifications. Final material, dimensions, compliance, MOQ, pricing, packaging and lead time are confirmed against the approved supplier quotation and sample.

How we work

A clear path from requirement to shipment.

1. Share requirement

Product reference, specification, target quantity and destination.

2. Source & compare

Identify suitable suppliers and align commercial options.

3. Sample & approve

Review samples, branding, packaging and final specifications.

4. Order & coordinate

Confirm production plan, documentation and inspection needs.

5. Ship & support

Coordinate export documents, logistics and delivery follow-through.

Start your product enquiry

Send the product name or image, specifications, quantity, destination and packaging requirements.
