CSL IMPEX Eyewear Selections

Metal & Rimless Sunglasses

Source Globally. Trade Seamlessly.

101 Source-Page References

Product photographs, colour options and source-listed specifications

Catalogue Guide

Select by the CSL reference printed on each product page. Include the original model and colour code shown in the artwork, quantity and destination when requesting a quotation.

Product dimensions, weights, colour codes and material/lens descriptions are retained in the original selection artwork. Read each page individually: materials and lens types can differ within the same collection. Repeated models and colour-only continuation pages are retained; page totals are not a verified count of distinct products.

Supplier identity has been replaced with clean CSL presentation labels using precise document editing. Product geometry and technical diagrams have not been AI redrawn. Added CSL product marks are branding concepts, not confirmation of factory-applied branding. Confirm the supplied finish, branding, packaging and accessories before ordering.

Polarised, photochromic, anti-blue-light and night-vision wording is source-listed selection information. It does not establish independently tested protection, certification or medical benefit. CSL IMPEX does not claim to manufacture or certify these selections.

Dimensions use the units shown in the diagrams. Do not infer a unit from a bare number such as 1.1, 2.0 or 2.5. Original abbreviations and any inconsistent source values are retained for confirmation. Prices, minimum quantities, lead times and documentation requirements are agreed per enquiry.

For optical frames, lens fitting and prescription suitability require confirmation with the order. Colour appearance can vary by screen, lighting and production batch.
