HOW TO USE THIS CATALOGUE

Choose Your Direction.

Supplied Photo Selections

Photographs selected from supplied reference files retain the original jewellery appearance. A selection may show several pieces or colourways. Availability and specifications must be confirmed.

Design Concepts

The 1,152 AI-generated design and finish concepts are visual starting points for sourcing and development. They are not photographs of verified stock or technical production drawings.

A Reference for Every Enquiry

Quote the CSL-JP photo selection or CSL-JC concept number, along with quantity, destination, preferred material, dimensions and finish. We will confirm feasibility, samples, pricing and lead time.

A Broad Range

Necklaces, pendants, chains, earrings, hoops, studs, rings, bracelets, bangles, cuffs, anklets, toe and foot jewellery, nose jewellery, body chains, brooches, hair accessories, cufflinks and tie clips.

OPTIONS FOR YOUR ENQUIRY

Materials & Finishes.

Base Material Options

Alloy (composition to specify), brass, copper, stainless steel (SS; grade to confirm), sterling silver (purity to verify) and titanium where feasible. Resin, acrylic, enamel, beads and mixed-material designs may also be requested.

18K Gold Finish Option

18K gold plating may be requested on selected designs, subject to confirmation of the base metal, plating specification and sample. Gold-tone polish is a colour/finish description; it does not by itself establish an 18K gold layer. Neither finish means solid 18K gold.

Other Finish Directions

Silver-tone, rose-gold-tone, mixed-tone, polished, brushed, matte, hammered and textured finishes. Plating method, thickness, durability and care requirements are agreed for each order.

Stones, Pearls & Product Details

Glass, cubic zirconia, crystal-look elements, resin, shell and pearl options can be explored. Confirm the exact type and origin. Photographs, colours and source markings alone do not verify composition, purity or gemstone identity.

CUSTOMISATION AVAILABLE

Your Design. Your Details.

Design & Fit

Silhouette, pattern, ring size, chain or anklet length, earring dimensions, clasp style, adjustable fittings and matching sets.

Colour & Personalisation

Selected material and finish, stone or enamel colours, initials, names, engraving and logo application where feasible.

Brand Presentation

CSL or customer-approved display cards, pouches, gift boxes, labels, assortment packs and private-label packaging.

From Reference to Order

Share a reference code or sketch and your requirements. Material choice, construction, samples, minimum quantities, price, testing needs and delivery schedule are confirmed before an order is agreed.
